

Marcela-Sabina Rusu

PdD Candidate, SNSPA

PROFILE

After an eight-year hiatus, during which I was mainly active in the public sector and continued to regularly consult scientific literature, I decided to return to academia.

My objective is to contribute to the research and understanding of the topic of unresolved conflicts in the post-Soviet space as a tool of Russian foreign policy, using game theory instruments.

The topic became all the more relevant after Russia's decision to invade Ukraine.

ABILITIES

- Critical thinking
- Resilience
- Interest and need for continuous learning
- Tolerance and empathy

ACADEMIC EDUCATION
