ABOUT ME

Dragoș Vetrescu is a cybersecurity professional and researcher specializing in international security and intelligence studies. With current experience in international organizations, his work explores the strategic and operational implications of cyber operations for global security. His academic research addresses questions of cyber power distribution, intelligence-sharing frameworks, and the integration of cyber capabilities into national and allied defense strategies. Dragoș Vetrescu aims to bridge the gap between practice and scholarship by combining hands-on expertise in threat intelligence with theoretical perspectives on security studies and international relations.
