Secureworks

2 years 8 months

Senior Information Technology Security Analyst

March 2020 - September 2021 (1 year 7 months)

Bucharest, Romania

- handling the alerts and respond to activity within the client's environment
- investigating high alerts, determining the source of the threat, the extent to which client assets have been compromised, making recommendations for remediation, and assisting in the implementation
- performing daily operational 'eyes on glass' real-time monitoring and analysis of security events from multiple sources including but not limited to events from SIEM tools (QRadar and Splunk), network and host based IDS and IPS (DarkTrace, firewall logs, system logs (Unix & Windows), mainframes, midrange, applications and databases
- collaboration with Line of Business technical teams for issue resolution and mitigation
- documentation of actions taken for audit, regulatory and legal purposes within approved event tracking system

- provide antivirus & malware protection application administration and management (for example, but not limited to Symantec or CrowdStrike)
- routinely interact with vulnerability and threat management teams and incorporate feedback into information security applications (e.g.: Nexpose)
- experience with Database Security (e.g.: Imperva)
- experience with Ivanti/LANDESK and ServiceNow

Information Technology Security Analyst

February 2019 - March 2020 (1 year 2 months)

Bucharest, Romania

- handling the alerts and respond to activity within the client's environment detected by Dell SecureWorks Managed Security Services.
- investigating high alerts, determining the source of the threat, the extent to which client assets have been compromised, making recommendations for remediation, and assisting in the implementation.
- performing daily operational 'eyes on glass' real-time monitoring and analysis of security events from multiple sources including but not limited to events from SIEM tools (QRadar and Splunk), network and host based IDS, firewall logs, system logs (Unix & Windows), mainframes, midrange, applications and databases.
- collaboration with Line of Business technical teams for issue resolution and mitigation.
- documentation of actions taken for audit, regulatory and legal purposes within approved event tracking system.
- provide antivirus & malware protection application administration and management (for example, but not limited to Symantec, CrowdStrike, Darktrace)
- routinely interact with vulnerability and threat management teams and incorporate feedback into information security applications (e.g.: Nexpose)
